Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiners and the applicant's representatives agreed that the proposed amendments to Claims 28 and 72 distinguish above Bennett and Frohm. No agreement was reached on the proposed amendments to 94 to 96, as the examiner believed they read on a minimum average payout required by gaming regulations. The applicants pointed to Fig. 13 of their spec. to more precisely point out their invention. 50 in the top row of Fig. 13 only corresponds to 10, 20, and 30 in the bottom row and 40 in the top row of Fig. 13 only corresponds to 10, 20, and 30 in the bottom row, so the total expected award when 50 or 40 appear in the top row will be an average expected value. This is enabled by pages 39 and 40 in the spec. Mr. Masia indicated the claims would be more precisely drafted to reflect the invention of Fig. 13 (pp. 39, 40, spec.). The upper and lower rows of Fig. 13 in the spec. do not move completely independently of each other, thus the average expected award.
